FTS Connect offers a flexible, full-featured, total virtual payment solution for businesses. The company is partnered with First Data Merchant Services, one of the world's largest transaction processors, and SecureNet's world-class advanced payment gateway. FTS Connect is backed by parent company, Financial Transaction Services ([www.ftservice.com](http://www.ftservice.com)), one of the most trusted names in the industry – founded on a passion for customer service excellence. Our commitment is to provide the most cost-effective total payment solution, while ensuring that your access to expert customer assistance is only a phone call away.

The FTS Connect platform combines ease-of-use, unprecedented flexibility and a full suite of professional payment tools. Our state-of-the-art virtual payment processing technology is secure, scalable and fully customizable. Solutions include a sophisticated integration and reporting system that optimizes workflow – providing the most cost-effective payment platform. The majority of our technology can be used immediately, with virtually no learning curve and no software or hardware to purchase, install or maintain.

## Virtual Terminal

FTS Connect provides complete card processing for Visa®, MasterCard®, American Express®, Discover®, Diners Club®, JCB, Debit/ATM, and private label cards for retail, mail order/telephone order and Internet businesses. With FTS Connect you can provide your business clientele with a variety of business-specific payment methods, including business credit cards, purchasing cards, government cards and checks. The FTS Connect Virtual Terminal works in conjunction with First Data and SecureNet's advanced payment gateway to provide a secure, reliable and cost-effective system for authorizing and managing payment transactions over the Internet.

## Quick Start with or without Shopping Cart

Our entry-level solution is so simple, you can be fully operational in two days, using only 15 minutes of your time. This includes a fully integrated merchant account, a virtual terminal with shopping cart (if needed), and product management tools - all in one place. There is no need to purchase hardware or install software. Our system generates "cut & paste" links for easy "pay here" buttons for your website.

## Scalability

Our solution is designed to scale from a small to a large business without interruption. Even our most sophisticated solutions for large companies are easy to set up and integrate with your back-end systems.

## Availability

Our state-of-the-art data center is monitored 24/7 with 99.9999% availability.

## Customization Workflow Integration and Reporting – Improving Efficiency

The FTS Connect Virtual Terminal integrates with most accounting software platforms to allow seamless electronic payment of open invoices and eliminate the need to enter payment data twice. We support various accounting system exports for smaller companies and offer a full API for sophisticated back-end accounting integration. You'll also get great reporting capabilities that are available from any Internet-enabled PC.

## Fraud Detection and Prevention

FTS Connect offers extensive fraud and risk prevention features that lead the industry in protecting merchants. This helps ensure that your sensitive credit card and ACH data is securely stored. Moreover, we perform real-time fraud control, including AVS, CVV and CVV2, at no additional charge.

## Security and Compliance

FTS Connect provides the highest level of payment security, safeguarding the complete protection of your confidential information. This assures compliance with PCI data security standards, helping you avoid government fines and ensuring you never lose the trust of your customers by having your security breached. Store credit card, electronic check and other sensitive data in the FTS Connect Secure Vault, a secure and reliable CISP, PCIP and PABP compliant environment – without the need to store this data on your local servers. This technology can be seamlessly integrated into your current applications.

## Online Invoicing and Expedited Reconciliation

FTS Connect supplies a customizable invoicing environment, providing the ability to automate invoicing in specific data formats, via email, fax or postal mail. The enables the potential to outsource the delivery of your invoices and simplifies reconciliation.

## Recurring Payments

Your customers can prearrange to automatically make payments directly from their account to yours. FTS Connect provides the ability to initiate direct debits or credits to your customer's bank account or credit card in a secure, fraud-protected environment. The system tracks card expiration dates to avoid interrupted payments due to expired data.

## E-Check Solutions

Our E-Check solutions allow you to process checks over the phone or via the Internet. FTS Connect Electronic Check Services moves payments electronically from your customer's checking account to your FTS Connect merchant account. This can be done by your company and by your customers.

## 24/7 Customer Service and Customer Education

FTS Connect educates our clients to process payments as economically as possible. In addition, we will monitor your merchant account rates to help ensure that you always get, and maintain, the best rates.

Whether yours is a smaller company just getting started with virtual payment processing, or a larger company looking for a more robust technology with lower rates, FTS Connect has a solution for you.
